Player Journey Map

The first 15 minutes, moment to moment.

SQUNCHIES
PRE-PRODUCTION PACKAGE · 2 OF 4

0 - 30 SEC

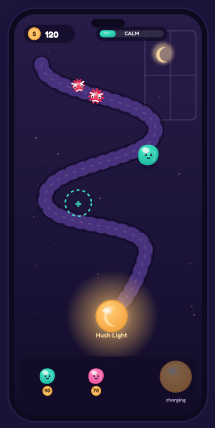

SEES & DOES
One glowing toy on a dark shelf. A prompt: press and hold. They squeeze, it deforms, a ring fills, they let go and it pops.

DECISION
None yet. Just feel the squish. The 30-second job is to make the touch feel good.

Curiosity

STOP / RETURN
Too early to stop. The good feel pulls them to the next squeeze.

1 - 3 MIN

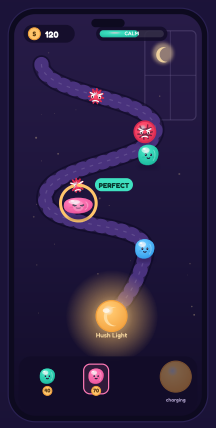

SEES & DOES
A first Snarl creeps in. The game hands them Squish and a glowing slot. They drop their first Squnchie and clear a tiny wave.

DECISION
Where to place the first toy, and when to squeeze it.

First agency

STOP / RETURN
A new toy type is one wave away. Natural to keep going.

3 - 8 MIN

SEES & DOES
A second toy unlocks. A tanky Knot shrugs off taps, forcing a charged, well-timed squish. The Calm meter starts filling.

DECISION
Which toy answers the Knot, and whether to save Squish or upgrade now.

Lean-in tension

STOP / RETURN
Calm meter almost full. One more wave to earn the Hush Pulse.

8 - 15 MIN

SEES & DOES
The night's real test: mixed Snarls, a faster Spark. Calm fills, Hush Pulse fires and soothes the board. A reward toy drops for the Shelf.

DECISION
When to spend the Hush Pulse, and what to chase next (a new Room, or the Shelf).

Mastery + relief

STOP / RETURN
A new Room and tomorrow's Wind-Down are teased. A comfortable place to stop, with a reason to return.
